

E McMullan Ltd - Quality Policy Statement

McMullan Ltd aim to be leaders in the provision of engineering consultancy for Water Management activities, GPS Topographical/Utility surveying activities, Software development and Data analysis & Management Services in Northern Ireland & Great Britain. The Company endeavours to ensure satisfaction by offering leading edge services that fully meet the customer's expectations whilst also complying with the requirements of ISO 9001:2015 and all other applicable standards, specifications and requirements of society.

It is therefore the Company's general quality objective to focus every effort to ensure that the customer's needs and requirements associated with the supply of our services are met with the full extent. We will achieve our objectives through a properly directed approach in which every member of the organisation is aware of his/her responsibilities.

Company management is committed to monitor, review and continuously improve the quality management system (including this policy and its associated objectives) to ensure its continued suitability and effectiveness within an Integrated Management Framework.
